

I-SEAMORE

I-SEAMORE Final Demo & Event Press Release

Integrated surveillance ecosystem for European Authorities responsible for
Maritime Operations leveraged by reliable and enhanced aerial support

I-SEAMORE FINAL DEMONSTRATION AND EVENT

Highlighting innovation and collaboration in Maritime Surveillance

The I-SEAMORE project will host its Final Demo and Event on 16 and 17 of September 2025 in Troia and Setúbal, Portugal, marking the conclusion of the years of research, development, and cross-sector collaboration in support of more integrated and intelligent maritime surveillance.

Designed to improve situational awareness and support border management authorities, the I-SEAMORE platform integrates multiple technologies into a scalable and modular solution. The Final Event will provide a platform for demonstrating these results and enabling dialogue among stakeholders from across the security, maritime, policy, and innovation domains.

The event will begin on the 16 of September with a live demonstration of the I-SEAMORE platform in an operational environment, at the CEOM (Centro de Experimentação Operacional da Marinha) in Rua dos Fuzileiros, 7570-791, Tróia, Portugal, offering participants a first-hand look at its technical capabilities.

On the 17 of September, a full-day conference held in Hotel Cristal Setúbal (R. Prof. Augusto Gomes 3, 2910-067 Setúbal), will bring together technical partners, external experts, and end-users. Highlights will include a keynote intervention from a representative of FRONTEX, the European Border and Coast Guard Agency, a dedicated stakeholder feedback session led under the project's participatory monitoring and evaluation framework, a focused session on access-to-market strategies for I-SEAMORE technologies, including direct exchanges between technology providers and potential end-users, and much more.

The event will also feature presentations by project partners, thematic discussions on maritime surveillance innovation, and opportunities to reflect on the future of European cooperation in maritime security.
